

## AdvanceTEC Selected for Cutting-edge Gene Therapy cGMP Cleanroom Design-Build Project

*AdvanceTEC's technology leadership and integration approach key to award by industry leading ECPM and global repeat client*

**Richmond, VA, April 1, 2019** – AdvanceTEC, the leader in cleanroom design, cleanroom construction and mission critical process integration, today announced that the company has been selected for a cutting-edge gene therapy cGMP cleanroom fast-track design-build project. AdvanceTEC has previously completed multiple successful projects for the project team, an industry leader in gene therapy technology.

The decision was driven by AdvanceTEC's industry leading performance, which leverages technology across the project execution spectrum. AdvanceTEC demonstrated industry leading 3D BIM design and collaboration technology, including VR (virtual reality) and AR (augmented reality) as a part of coordination process, as well as advanced digital building scanning and layout and tablet enabled PMS (project management access software) for 24x7 real-time connectivity. Also noted was the company's innovative field execution model and direct field cGMP skilled install crews.

"We are excited to once again be serving this industry leading team on such a strategic project," commented Bryan Phelan, AdvanceTEC managing partner and director of sales, marketing and business development. "While our investments in technology enable improvements in speed, accuracy and project efficiency, we know that technology alone is not effective without a customer-centric attitude and culture – and the teamwork that results. This combination is required for safe and successful execution of fast-track design-build cGMP projects that deliver to the aggressive schedules demanded for next generation remedies. This project is a strategic team win – and we are going to hit it out of the park for our customer."

### **About AdvanceTEC**

AdvanceTEC is the leader in cleanroom design, cleanroom construction and mission critical process integration serving clients in the Nanotechnology, Microelectronics, Pharmaceutical and Biotechnology industries. Since its founding in 2000, AdvanceTEC has successfully constructed facilities for research, pilot production and high-volume manufacturing applications. The company works with leading technology companies, construction managers, architectural engineering firms, lab planners and developers to estimate, value engineer, design and construct state-of-the-art cleanrooms. Its expertise is turn-key design/build projects, where performance, schedule, and safety are critical. For more information, please visit [www.AdvanceTECLLC.com](http://www.AdvanceTECLLC.com).
